CHALLENGING THE COMMONLY
ACCEPTED TO CREATE THE
EXCEPTIONAL AND INNOVATIVE

Traditional design and development processes in the US where each aspect –architecture, interior design, landscaping, product design and engineering –are treated separately and in a linear fashion, can create discordant results.

The Total Concept Design™ process used for The Residences were holistic and concurrent, with the continuous interplay between experts to craft a finely interwoven symphony. The result is a sense of harmony and unity between architecture, landscape, nature, and the resident.

It's a completely different approach. It's not a definition of style, it's more a definition of the quality, how you use the space, how you use the the object.
